The Transformative Power of Deliberative Democracy in East Asia

Edited By **Mei-Fang Fan, Alice Siu**

This book explores the evolution and impact of deliberative democracy in East Asia, focusing on Taiwan, South Korea, and Japan through a deliberative systems framework.

Democratization and democratic development in the region are intertwined with social movements, public participation, institutional reform, and deliberative innovation. The book highlights how deliberative democracy can transform politics, inform policymaking, and strengthen democratic governance, while also exploring the integration of deliberation with digital technologies and artificial intelligence to advance democratic innovations. Drawing on practical experiences, it demonstrates how democratic deliberation can shift public attitudes, shape policy, and address complex challenges.

Essential reading for students and scholars of East Asian politics and deliberative democracy, *The Transformative Power of Deliberative Democracy in East Asia* is also invaluable for political and social scientists interested in comparative democracy, public governance, and public participation in science and technology.
